BAG SUPPORT

B2166

A patent fitment which clips on to rear stays of bicycle and clamped in position by winged nut and screw.

Price : 5/6

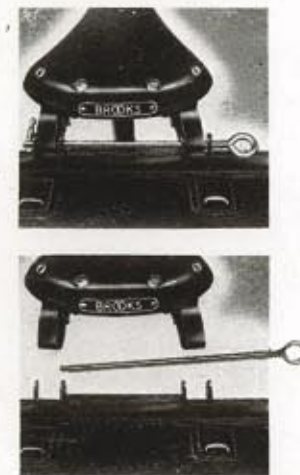

THE BROOKS P.V.C. SHIELD

P.V.C. is an extra tough, durable, plastic material, built to withstand chafing and hard wear.

Protection of vital parts. Where necessary this is provided by a P.V.C. Shield, A-B (see sketch) at those points most subject to wear, so that BROOKS Cycle Bags last longer and wear better. The steel suspension bar, C, is thus pocketed and fully protected by P.V.C.

BROOKS QUICK RELEASE ROD

A simple, effective fitment — exclusive to BROOKS — designed to enable the Cycle Bag to be quickly removed from the saddle.
